

## Remarks

Claims 1 to 25 were previously pending. Claim 1 has been rejected under 35 U.S.C. 102(e) as being anticipated by United States Patent No. 6,727,847 (Rabinowitz et al). Claim 7 has been rejected for including the indefinite phrase: "a very little". The title of the application has been rejected for being non-descriptive. Claims 2 to 25 have been objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The claims of the application have been amended to overcome the objections of the Examiner and to better define the invention in light of the prior art. In particular, the elements of claim 1 have been added to claim 2, thereby placing it in condition for allowance. Claim 7 has been amended by the deletion of the phrase including "a very little".

The title of the application has been changed to the more descriptive: Digital Television Transmitter Identification System Using Pseudo-random Sequences

Applicant respectfully requests reconsideration of this application.
